

# MSR

Generation 4

## MULTIPURPOSE SNIPER RETICLE

illuminated aiming point  
Cross dimensions updated to 1x1mrad

Main hair line thickness 0.05mrad, intermediate between P4 and P4 fine

1mrad hash marks 0.05mrad thick, 0.5mrad marks 0.03mrad thick for clean sight picture

Clear, numbered vertical axis marks in 10mrad division for extreme long range shooting, target location definition or for rapid hold-overs in closer ranges

Combat -proven P4 now with next generation improvements:

Numbered milliradian marks in 10mrad division for improved team communication and target acquisition.  
Heavy line thickness 0.6mrad

Proven P4 -style 0.2mrad division secondary milling scale for low-light situations  
Line thickness 0.03mrad

Advanced 0.5m x 1m stadia up to 1300meters for rapid ranging and target engagement

Ultra-fine 0.1mrad division laser back-up milling scale for accurate target size measurements or against high-risk targets with laser detectors.  
Scale location near to optically best FOV center  
Line thickness 0.02mrad
